**METALS, MINERALS, AGRI PRODUCTS,
CHEMICALS, WASTES, INDUSTRY RESIDUES
HORIZONTAL VALUE CHAIN**

INVESTOR DECK

WWW.INDUSTRYMARKETPLACES.COM

Problem

Clients want to know the prices and availability of products in real time.

There is no investment in stock, but nevertheless production wheels must be in motion to avoid losses.

Traditional vertical networks are not enough to meet the hectic needs of customers.

Raw materials must be found 24/7.

The shortage of raw materials is worldwide.

Online marketplaces, so called sharing economic improve resource efficiency of economies, increase transparency, benefit competition and disrupt current economic structures.

Their share of the Gross Domestic Product (GDP) of the western economies is estimated to rise to 25 percentage by 2025.

Almost always, valid classification of the main and sub-categories connected category-specific keywords are missing.

Therefore, there is nothing to search and watch results ate in complete chaos.

WWW.INDUSTRYMARKETPLACES.COM

Solution

www.IndustryMarketPlaces.com offers to sellers, to buyers, to service providers to sell and to buy products and services regional and globally 24/7 in accordance with market economy logic.

Use is totally free of charge and man pays only for completed transactions.

Metals (iron, aluminum, copper, zinc, lead and nickel etc.).

Earth Metals (skandium, yttrium, lantaani, cerium, praseodyymi, neodyymi, prometium, samarium, europium, tulium, ytterbium, lutetium etc.).

Precious Metals (silver, iridium, gold, osmium, palladium, platinum, rhodium ruthenium etc.).

Minerals (calcium, magnesium, phosphorus, iron, zinc, sodium, selenium, potassium, iodine, manganese etc.).

Chemicals (basic chemicals, industrial chemicals, synthetic chemicals, mixtures etc.).

Agri Products (grains, fruits, vegetables, fish, livestock, canned food, meat etc.).

Recycling Items (general wastes, industry residues, waste management).

WWW.INDUSTRYMARKETPLACES.COM

Better/Different

We have a time-honored global competitive advantage.

There are no competitors in the world in these contexts.

That's why we need quick market penetration.

www.industrymarketplaces.com offers **IoT, AI, GIS, VOICE, METADATA** including to control processes, projects, data flows, material flows, cash flows and transactions with unique Voice-System in all industry branches.

This is a totally revolutionary solution for data mining and analytics related business planning and implementation to optimize profits and to minimize costs.

Quality Search, Watch, Sort, Compare, Edit, Count, Visualize, Analyze, Share and Archive provide demand and supply in accordance market economy logic worldwide 24/7

METADATA SOFTWARE TECHNOLOGY OF INDUSTRYMARKETPLACES (SAB)

SAB IT DB` s connections are primary objects in the database and hence provide fast querying capabilities on the data.

SAB IT DB evaluates logical rules. Its capabilities include reasoning over rdf metadata using configurable and dynamically modifiable rule sets and ontologies without recalculation over large datasets.

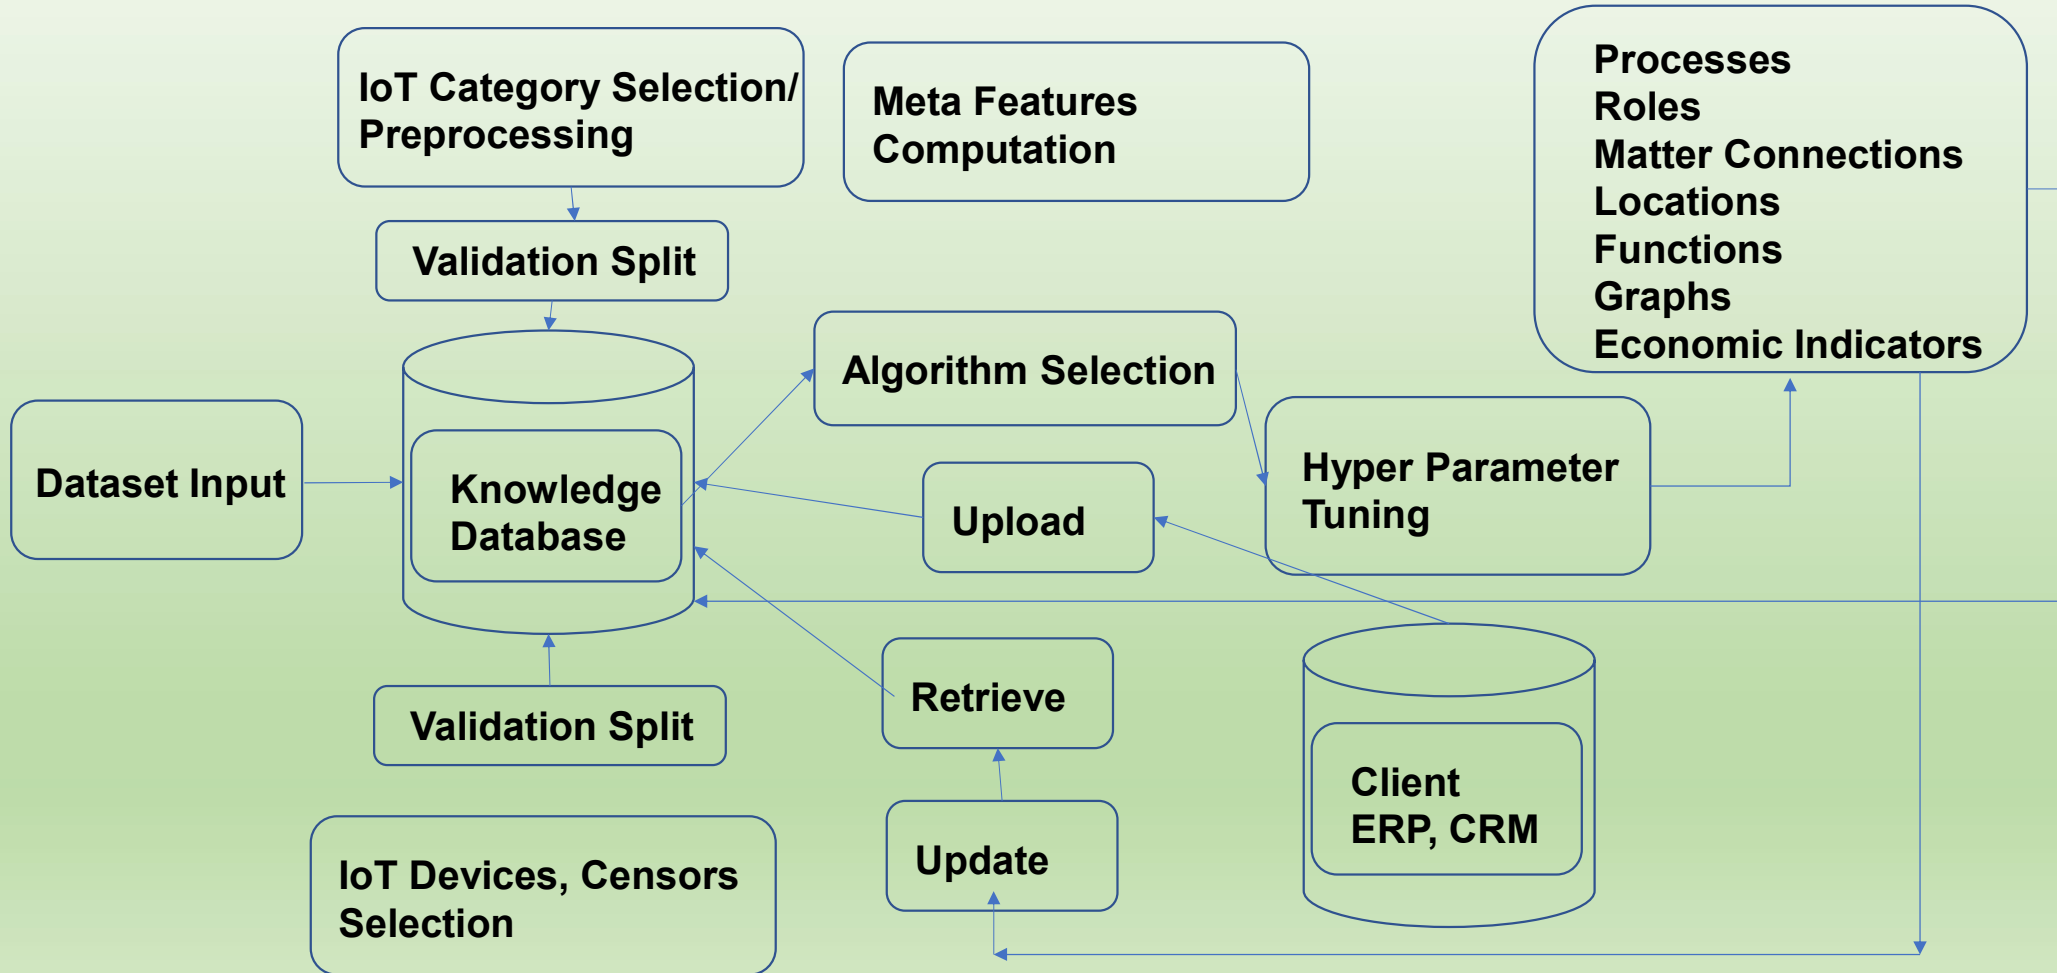

SAB IT DB supports custom rules as well as rule standards such as RDF Schema (RDFS) and Web Ontology Language (OWL). Using ontologies it is possible to enrich the metadata with for example equality expressions and cardinality restrictions.

SAB IT DB takes into account the context of search, location and the intent of queries to provide relevant search results. The technology refines data into critical information in real time.

Semantic search employ to better understand the context of a search. Is not just about simply discovering information anymore, it's about ordering the web into a coherent flow of information; how topics, themes, ideas, text, video, audio is connected and related to each other.
